

The Solo Founder's Systems Kit

Para-Inc // Operating templates to run a one-person company that compounds.

Weekly operating loop

Mon: plan 3 outcomes. Wed: review blockers. Fri: ship + write 1 lesson.
Always: capture every task the moment it appears (zero in head).

Money tracker (CSV)

```
date,type,amount,note
2026-01-01,rev,10,first sale
2026-01-02,cost,0.50,domain
```

Decision filter

Before any task ask: Does it create an asset, remove friction, improve capability, increase optionality, or strengthen the system? If none, decline or delegate.

The 10-dollar first principle

Prove demand with a real transaction before building more. One paid stranger > 100 compliments. Price in fiat or crypto, deliver instantly, ask for a referral.

Risk checklist

- Is the buyer real and reachable?
- Is delivery automatic and instant?
- Can I fulfil 100 copies without me?
- Is the payment method one I control?
